virtualization.info Rent-A-Lab

virtualization.info Rent-A-Lab is a fully-redundant enterprise infrastructure available on demand.

Every part of the equipment can be reached and configured online, including physical servers, network switches and SANs. No need to transport racks to your site!

It can be used to introduce your customers new solutions, to train company staff on new technologies, to compare and benchmark different products, to evaluate new software features or try a new beta or to study for a certification exam.

More details are available in following sections:
